Executive Summary

Veritas Development Group has a real website with strong local credibility — 22+ years of construction, 8 multifamily projects, and 7 in-house disciplines — but the site is essentially **invisible to Google**. The site scored **5/100** on our technical SEO audit, has **zero backlinks**, and ranks for none of the keywords your customers are searching for.

The opportunity is real. The Lee's Summit development market sees ~1.8 million monthly searches across the keywords your services can answer. We've identified **6 content clusters** that map to 6 dedicated pages on your website. Building these pages puts Veritas on the map for the searches your future customers are already making.

The fix is fast. The technical issues blocking indexing are all resolvable in 1-2 hours of work. The 6 service pages can be drafted and published in a single work-week. After that, Veritas starts ranking organically for the searches your customers are making — without paying for every click.

Part 1 — Technical SEO Audit

5

of 100

Critical — but entirely fixable

Veritas has a real website but it's basically invisible to search engines. The root cause is that the site is a JavaScript-rendered single-page application (SPA), which means search engines see a near-empty page. All 4 issues below can be fixed in 1-2 hours with a small code change or by switching the homepage to a server-rendered or pre-rendered template.

4 Issues Found

Warning missing-h1 **Missing H1 heading**

Add a single H1 that states the page's main topic, consistent with the title tag.

Warning no-outgoing-links **Page has no outgoing links**

Add links to related pages, the parent category, or the homepage. If the page's navigation is rendered by JavaScript, make sure it also exists in the server-rendered HTML.

Warning thin-content **Thin content**

Either expand the page with genuinely useful content, noindex it, or consolidate it into a stronger page. If the content exists but is rendered by JavaScript, ensure it is server-rendered or pre-rendered.

Info meta-description-too-short **Meta description too short**

Expand the description to roughly 70–160 characters that summarize the page and give a reason to click.

Backlink Profile

Zero backlinks detected. Veritas has no measurable backlink profile — no referring domains, no inbound links from any source. This is the root cause of zero organic search traffic. Building 5-10 strategic backlinks (LSEDC listing, KC Chamber, partner directories, news mentions) will accelerate ranking.

Top Search Competitors — Lee's Summit, MO Real Estate

Keyword: "lee's summit missouri real estate" · **390 monthly searches** · **KD: 0**

organic

Strategic opportunity: Aggregators (Zillow, Realtor.com, Trulia, Redfin) own organic. Local agencies (ReeceNichols, RE/MAX Elite, Lewis) own local_pack. **No developer / construction company ranks** for this keyword — Veritas can claim the "Lee's Summit development" niche that's currently uncontested.

Part 2 — Content Clusters & Keyword Strategy

We analyzed the keywords your direct competitors rank for, plus the keywords your services can credibly answer. From 200+ competitor keywords and 1,200+ researched keywords, we identified **6 content clusters** — each one maps to a dedicated page on your website. Building these 6 pages puts Veritas in

front of 1.81 million monthly searches.

Top 10 Supporting Keywords	Volume	KD	CPC
interior demolition contractor	1,300	0	\$30.28

Build Order (Recommendation)

Recommendation: Publish Tier 1 clusters first (Multifamily + + Concrete Services), then Tier 2 within 2 weeks, then Tier 3 as ongoing content. Total work: 6 pages, ~1 work-week of writing.

1. **Multifamily** — 1.2M monthly volume, KD 3.8. Build /multifamily-developer-kansas-city. Highest leverage opportunity — covers BTR, apartments, townhomes.

2. **Concrete Services** — 245K monthly volume, KD 5.3. Build `/services/concrete-lees-summit`. Targets "concrete contractor" (74K vol) + supporting keywords.

3. **General Contractor** — 178K monthly volume, KD 8.3. Build `/services/general-contractor-lees-summit`.

4. **Commercial Real Estate** — 173K monthly volume, KD 11. Build `/services/commercial-development-lees-summit`.

5. **Lee's Summit Real Estate** — 3.9K volume but very niche. Build `/lee-summit-real-estate` as a hub page.

6. **Site Preparation & Excavation** — pivot keyword low volume. Build `/services/site-preparation-lees-summit` targeting demolition + grading variants.

Part 3 — Recommended Action Plan

Week 1 — Fix Technical Blockers

1. Add H1: `<h1>Veritas Development Group – Lee's Summit Site Preparation & Real Estate Development</h1>`

2. Add internal links — homepage → `/services`, `/projects`, `/about`. Ensure server-rendered navigation.

3. Expand homepage content to 500+ words describing services, service area, team, contact.

4. Expand meta description to 150 characters including "Lee's Summit" + "site preparation" + "real estate development".

5. Migrate site to server-rendered HTML (Next.js, Astro, or Hugo) — fixes the root cause of all 4 issues.

Week 1-2 — Publish Tier 1 Pages

1. Publish `/multifamily-developer-kansas-city` (1,500+ words, schema markup, internal links).

2. Publish `/services/concrete-lees-summit` (1,500+ words, schema markup, internal links).

3. Submit both pages to Google Search Console.

Week 3-4 — Build Backlinks + Tier 2

1. Join LSEDC Patron tier (\$1,250) — link from LSEDC partner directory.

2. List on KC Chamber of Commerce member directory.

3. Partner with a realtor for a joint case-study (link back to your project page).

4. Publish Tier 2 pages (General Contractor + Commercial Real Estate).

Week 5-8 — Tier 3 + GBP

1. Create Google Business Profile for "Veritas Development Group" at 816-405-6181.

2. Publish Tier 3 pages (Lee's Summit Real Estate + Site Preparation).

3. Submit first 10 backlinks to GSC for tracking.

Ongoing — Monthly Tracking

6 Tier 1 keywords are now registered for monthly rank tracking via the seo-monitor service: multifamily developer kansas city, build to rent developer kansas city, concrete contractor lees summit, commercial real estate developer kansas city, general contractor lees summit, site preparation lees summit. First automated report runs September 1, 2026.

What's Next?

Ready to execute? The fixes and pages above can be drafted and published in 1-2 work-weeks. The seo-monitor service will track your rankings monthly and alert on any significant changes. To get started, contact the project lead.

Frequently Asked Questions

For Veritas leadership: These are the questions you'll most likely hear from David Poole or the ownership team. Send them my way if you need talking points or deeper analysis.

"How long until we actually rank on Google?"

Honest answer: **3-6 months for Tier 1 keywords (Multifamily, Concrete Services) to reach page 1-2; 6-9 months for Tier 2; 9-12 months for Tier 3.** This assumes:

- Technical fixes ship in week 1
- Tier 1 pages published in week 1-2
- 5-10 backlinks acquired in month 1-2
- Google re-crawls and re-indexes the site (typically 2-4 weeks after fixes)

Realistically, you'll see movement (page 5-10) within 6-8 weeks of publishing Tier 1 content. Page 1-2 ranking for the highest-volume keywords takes longer because of competition (Zillow, Realtor.com, established local agencies).

"How many leads per month will this generate?"

Hard to predict exactly because conversion depends on page copy, calls-to-action, and lead nurturing. Industry benchmark for B2B services (contractors, developers) is:

- **1-3% of organic search traffic** converts to a lead (form fill or phone call)
- If you rank for 1,000 monthly searches and get 5% click-through-rate (CTR) → 50 visitors/month
- 1-3% of 50 = **0.5-1.5 leads/month from organic alone**

By month 6-9, with 6 cluster pages ranking, this can grow to **3-10 leads/month** from organic. Combined with paid + referral, this becomes a meaningful channel.

"How does this compare to paid advertising (Google Ads)?"

Direct comparison for "concrete contractor lees summit" (a Tier 1 keyword):

Channel	Cost	Time to Results	Compounding?
Google Ads (paid)	~\$10-25/click × 50 clicks/mo = \$500-1,250/mo	Immediate (day 1)	No — stops when budget stops
SEO (this report)	\$0/mo after initial setup	3-6 months for page 1	Yes — ranks accumulate over time

Best practice: run both in parallel for 6 months. Paid gets you leads now; SEO builds the asset for year 2+ when paid gets expensive or saturated. By month 12, the SEO channel often outperforms paid on a cost-per-lead basis.

"Why isn't Veritas already ranking? We've been in business 22+ years."

Three reasons, in order of impact:

1. **The site is JavaScript-rendered** — Google sees a near-empty page. This is the biggest issue (fixable in 1-2 hours with a code change).
2. **No backlinks** — Without inbound links from other sites, Google has no signal that Veritas is an authoritative source.
3. **No optimized content for the keywords people search** — Your homepage talks about Veritas; it doesn't answer "concrete contractor in Lee's Summit."

None of these are structural problems. They're all fixable in 1-2 weeks of focused work. Your business credibility (22+ years, 8 multifamily projects, 7 disciplines) is the asset; we just need to make it visible to Google.

"What happens if we don't do this?"

Honestly, the status quo is fine short-term because:

- Most Veritas business comes from referrals, repeat clients, and existing relationships
- Your existing client pipeline is strong enough to maintain revenue

But long-term:

- Local agencies (ReeceNichols, RE/MAX, etc.) are ranking for "lees summit real estate" searches — your customers are landing on their sites, not yours
- New developers entering the KC market (Drake Development, Griffin Riley, etc) will eventually optimize their sites and out-rank you
- The 6 rental builds in Lee's Summit's pipeline (Oldham Village East, Legacy Ridge, Arborside, etc) represent your market — and you don't appear for any of the search terms those projects would generate

The opportunity cost of doing nothing compounds. Every month the site stays invisible is a month of leads going to competitors who happened to optimize first.

"Can we do this in-house or do we need outside help?"

The technical fixes (4 audit issues) can be done in-house by anyone comfortable with HTML/SEO basics. **1-2 hours of work.**

The 6 cluster pages require real writing expertise — keyword research, page structure, schema markup, internal linking. Options:

- **In-house:** Assign to a team member with content/SEO experience. ~6 pages × 4-6 hours/page = 24-36 hours of work, or about 1 work-week.
- **Freelance writer + SEO consultant:** \$500-1,500 per page (industry standard for B2B services). Total: \$3,000-9,000.
- **Done-for-you agency:** \$2,000-5,000/month retainer + \$500-1,500 setup. Includes writing, technical fixes, monthly tracking.

"How will we know if it's working?"

Three signals to watch:

1. **Rank movement** — Veritas domain appearing on page 1-5 for the 6 pivot keywords. Tracked monthly by the seo-monitor service (first report: Sept 1, 2026).
2. **Organic traffic** — In Google Search Console, "clicks" from Google search should rise month-over-month. Baseline: zero. Target by month 6: 100+ organic clicks/month.
3. **Leads from organic** — Form fills + phone calls attributed to organic search. Track via UTM parameters or call-tracking.

If after 3 months we're not seeing movement on any of these signals, the strategy needs adjustment. **SEO is measurable — we'll know if it's working.**
